Ref: Build America, Buy America Act

Dear Valued Customer:

Please let this letter serve as documentation that the steel pipe, sprinkler pipe, conduit and conduit fittings manufactured by Wheatland Tube Company are produced domestically in the United States of America. Additionally, Wheatland's products meet the Build America, Buy America (BABA) requirements of 100% made and melted in the USA, if requested on the purchase order.

Some sizes and schedules of Wheatland's pipe larger than 6" may not meet the Build America, Buy America (BABA) requirements due to our Atlas Tube (Zekelman Industries) manufacturing capabilities in Canada.

As of this writing:

- a. Wheatland's 8" through 18" ASTM A53 ERW Grade B pipe is 100% melted and manufactured in the USA.
- b. Wheatland's 8" Schedule 10 ASTM A135 Black and Galvanized pipe can be made in the USA or in Canada (@ Zekelman Industries).
 - a. Material made in Canada can be certified as finished in the USA.
- c. Wheatland's 10" Schedule 10 ASTM A135 Black and Galvanized pipe is made in Canada (@ Zekelman Industries).
 - a. Material made in Canada can be certified as finished in the USA.

Also, Speed Couplings are supplied by, not produced by, Wheatland Tube. Speed Couplings are not manufactured in the U.S.A. and do not meet the above-listed requirements.

Please note that Wheatland Tube cannot provide blanket statements certifying melt country of origin. For material that has already been shipped or installed, the heat number, run number, or tag (batch) number will need to be provided in order for Wheatland to verify or certify compliance with Buy America or Buy American requirements.

If I can be of any further assistance, please do not hesitate to contact me.

Sincerely,

Tiffany Dunworth
Technical Services Manager
